

The NebulEye System

Safety at the Speed of Light

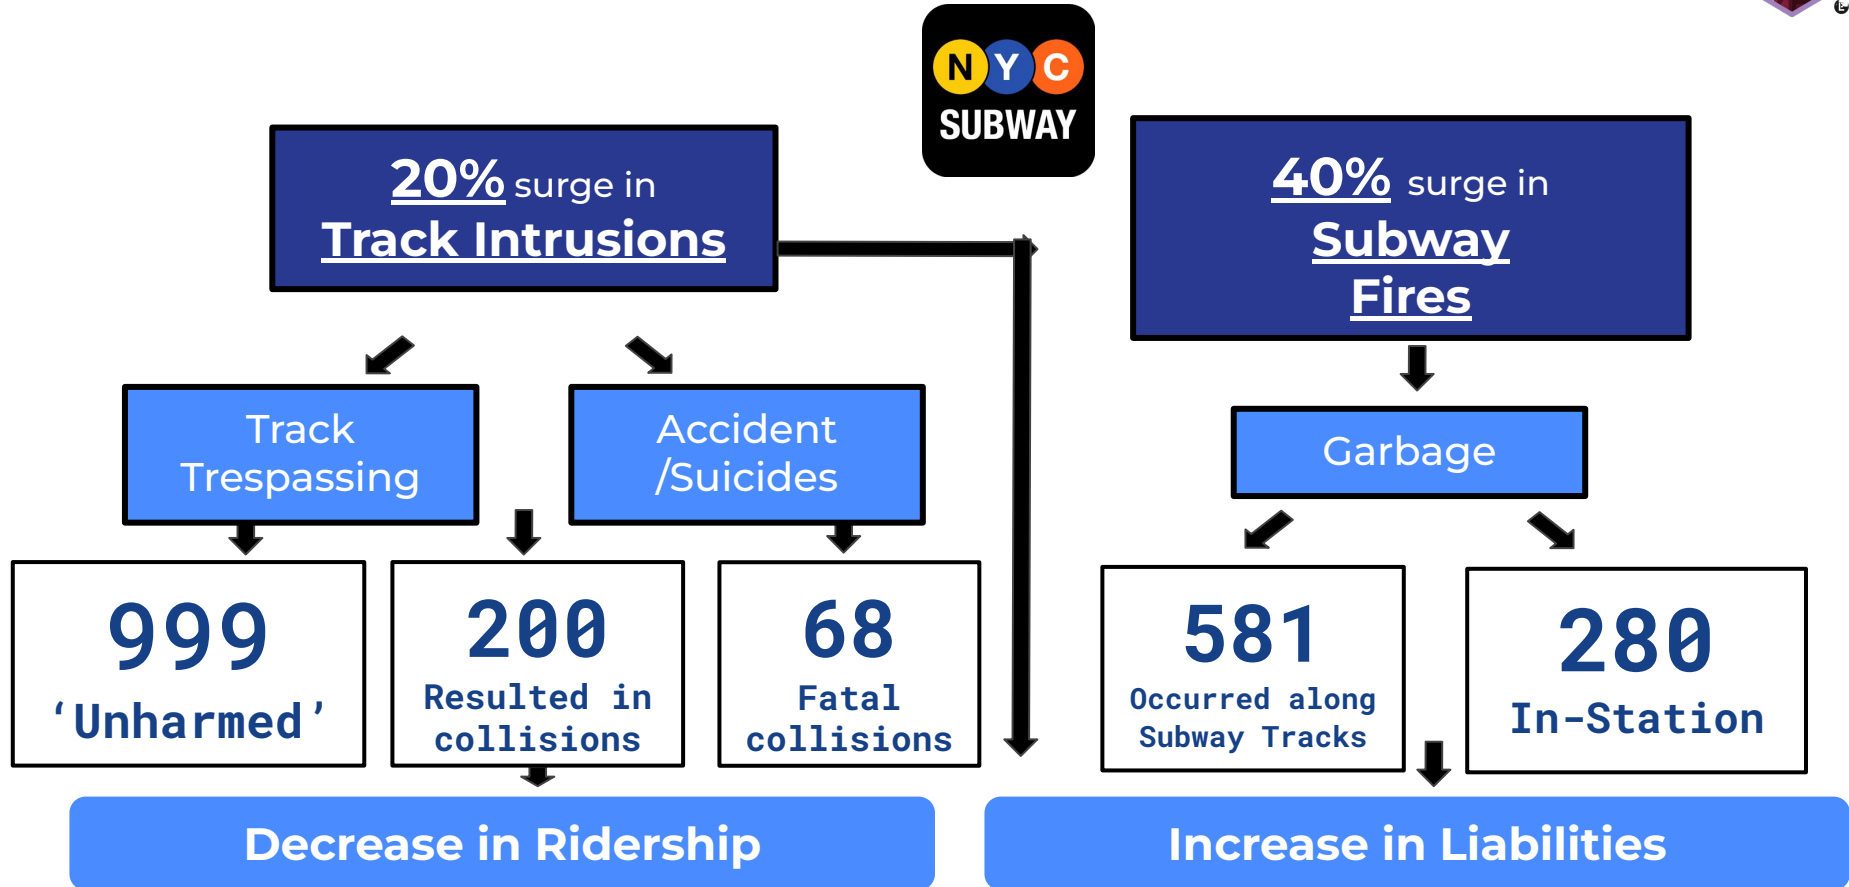

By: Olivia, Shawn, Justin, Haoran (Sara),
Nirali, Ritvik, Myles, Nathnael

Meet the NebulEye Team

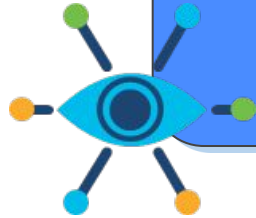

From 2019 - 2021...

Our Goals

**Faster and
Proactive
Response**

**Decrease
Liability Costs**

**Driver and
Control
Communication**

Rider Safety

The NebulEye System

Multi-measure System

Detects and Alerts Dangers

Light Detection and Ranging (LiDAR)

- Measures precise distance at the speed of light
- Lasers illuminate objects and record the delay between transmission and reception
- Sensor on the front of the train activate the breaks when an object is detected

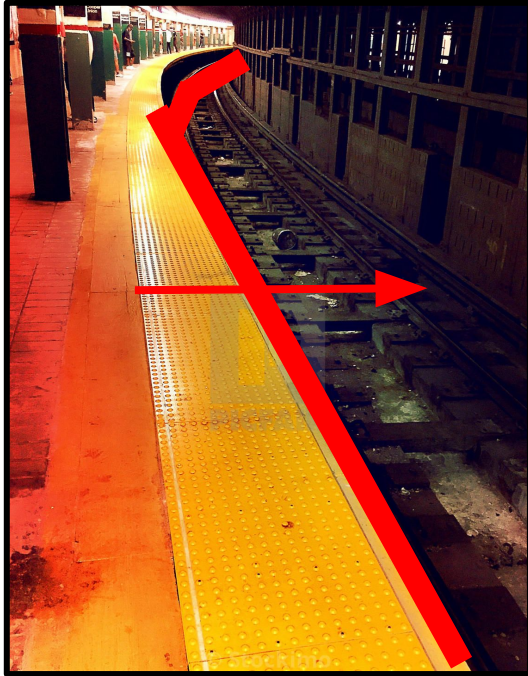

Meraki

Geofencing
Technology

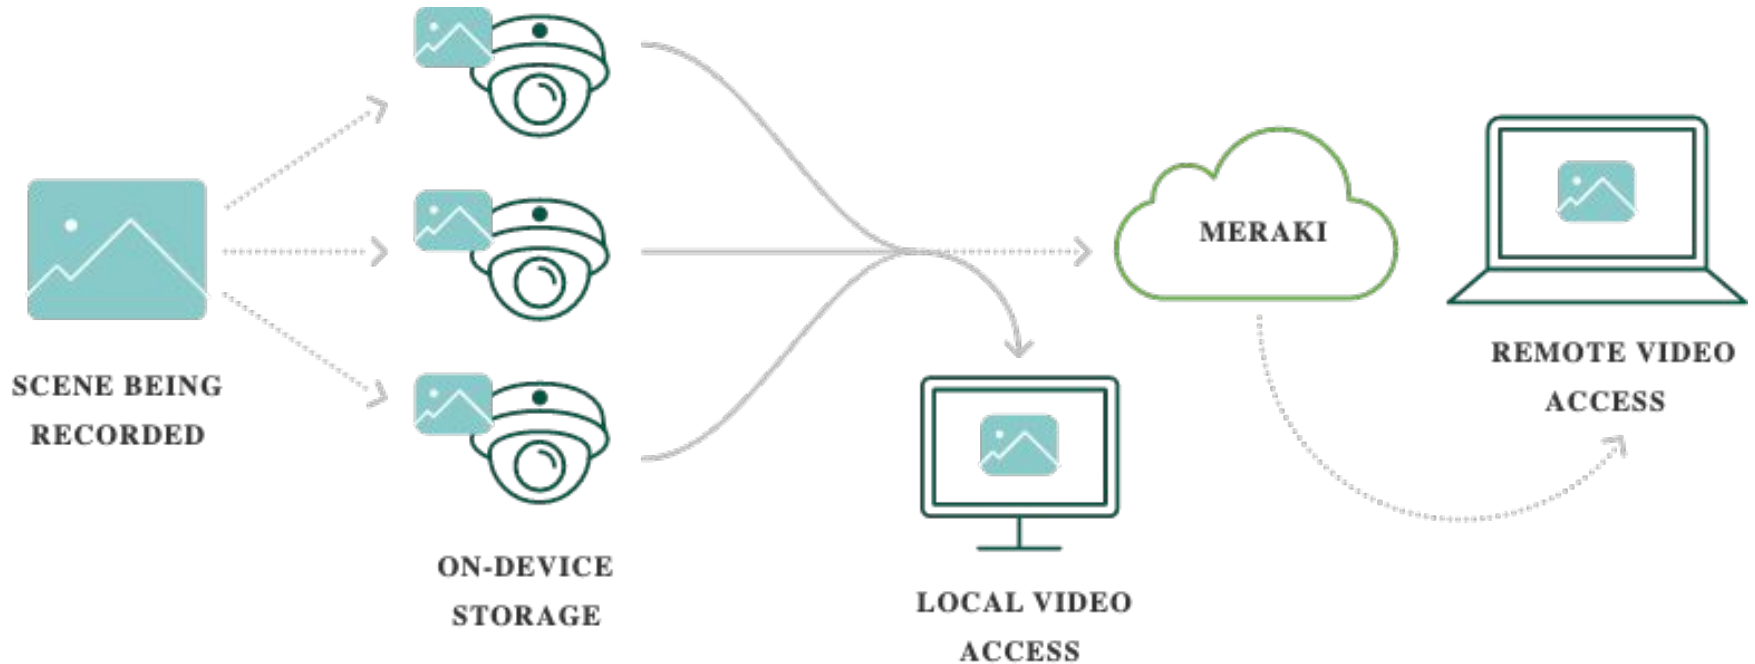

Real-time
Alert

- Resolution, Up-time, and Storage
- Detects motions
- Alerts Control Engineer and Driver
- Eliminates blind spots
- Identifies and investigates threats
- Usage of signs of being filmed

Process of Meraki Implementation

Cisco Ultra Reliable Wireless Backhaul

- High-performance radio transceiver
- Radios placed in stations, trains, and tunnels
- Fiber for stations and Mobi for trains
- Omnidirectional antennas on Train Radio
- Fail safe

24/7 Operation
and Incident
Analysis

Industrial Switch

**Industrial
Ethernet Switch
(Train
Connectivity)**

Speed

**High speed GE
Connectivity**

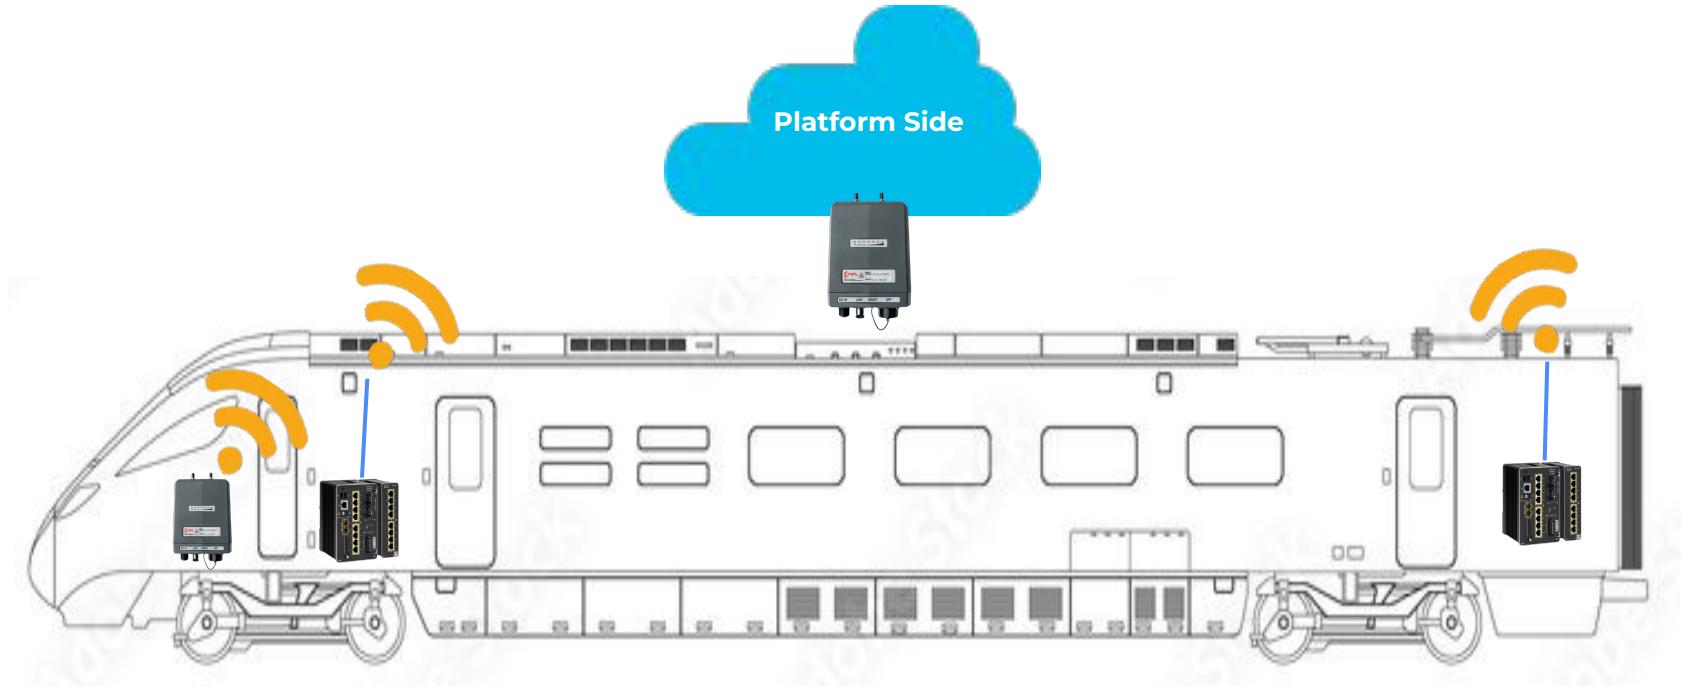

Secure

**Built-in
CyberVision**

Train-to-Platform Network

Cybersecurity

We require and will be implementing many cyber security aspects to secure our network:

- Duo
- Cisco Identity Service Engine (ISE)
- Cybervision
- ThousandEyes
- Stealthwatch

Implementing NebulEye

How:

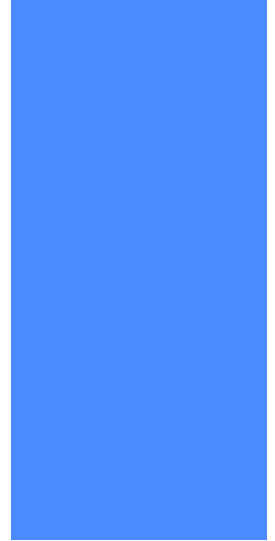

- Build relationships with subway and train stations
- What sets NebulEye apart?

Concerns:

- Recently developed technology
- Expensive to install
- Easing the transition to NebulEye

Solutions:

- Form long lasting partnerships
- Generate profit to ensure future progress

Benefits of NebulEye

**Modern
implementation of
CISCO and Meraki
Technology**

**Constant Adaptation
as needs increases**

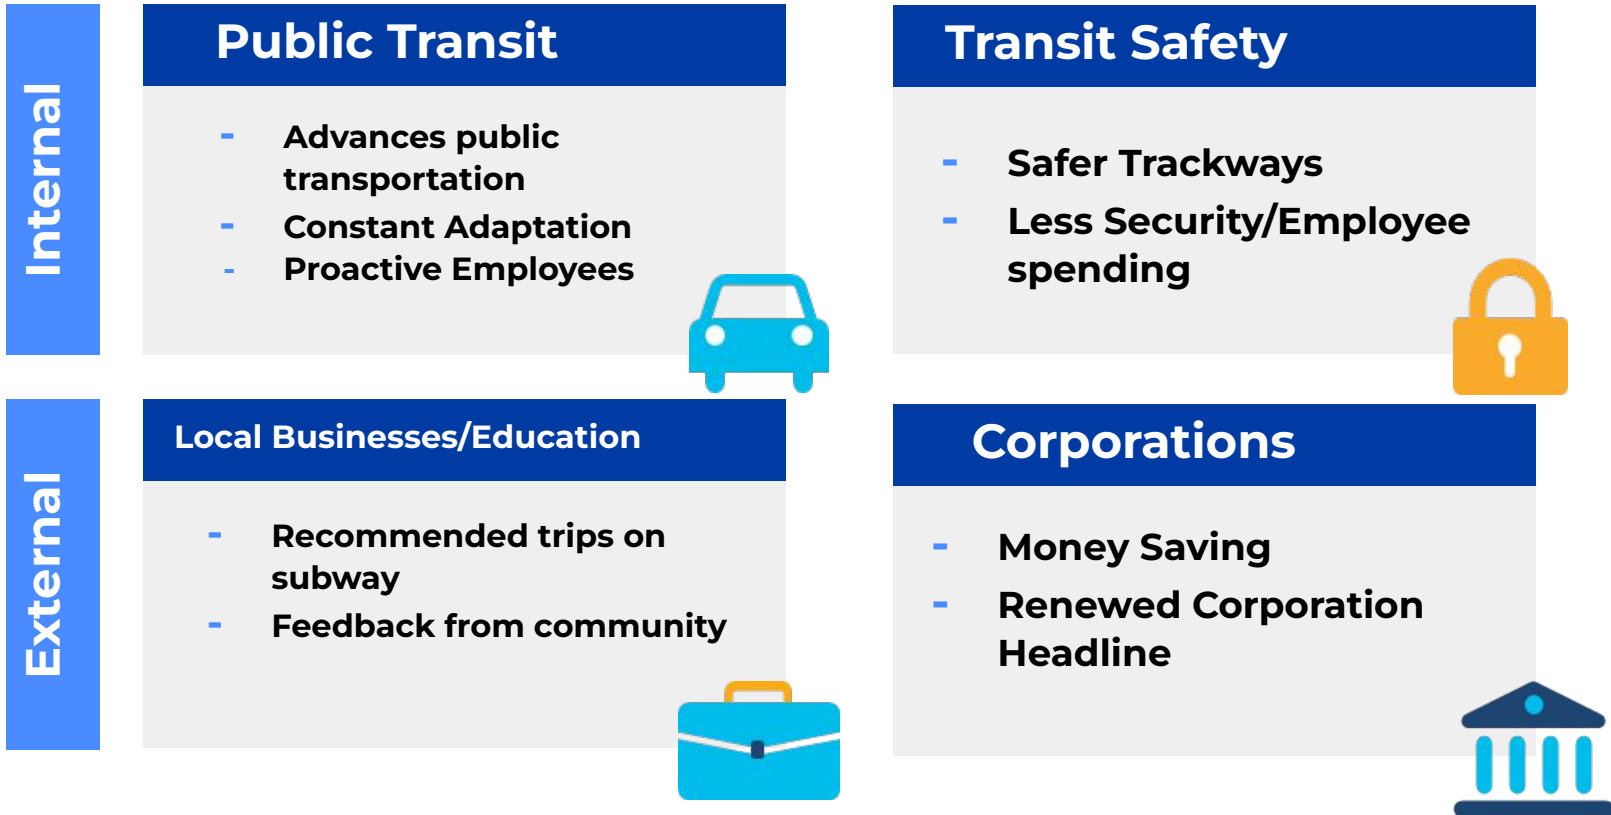

**Valuable
Partnership**

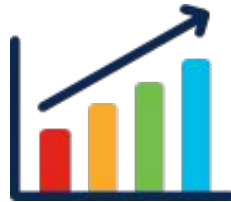

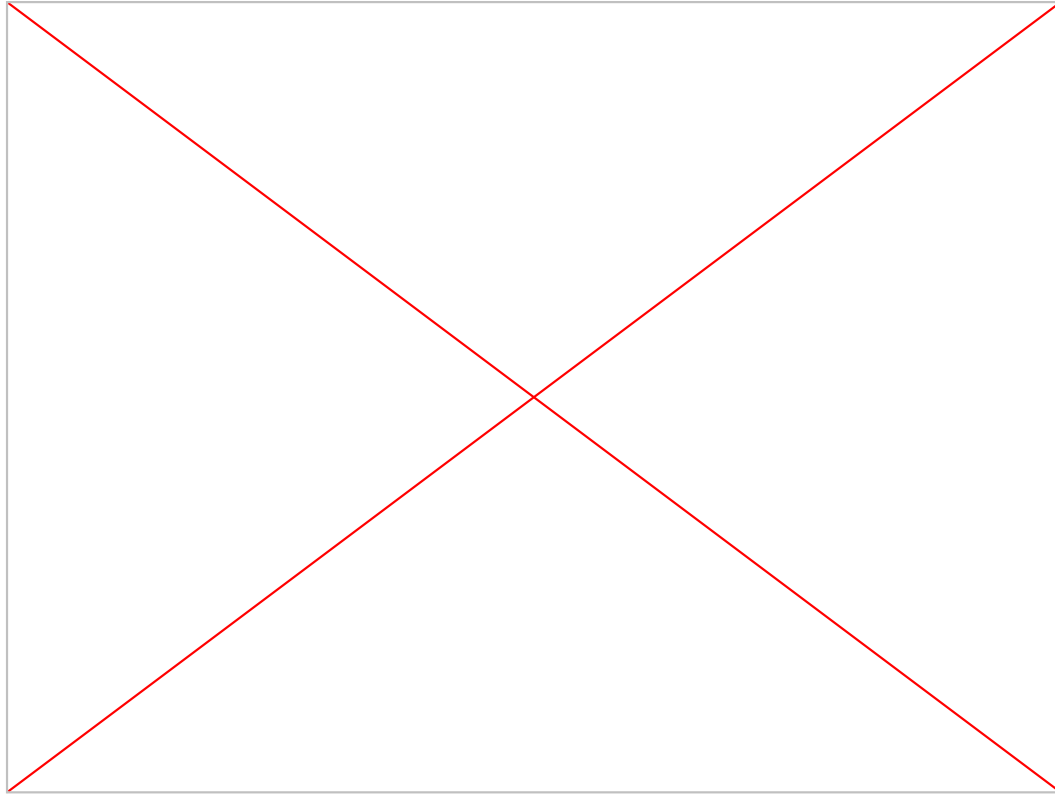

Impacted Industries & Return on Investment

Future Outlook

Thank you!
